

How to order :

For **non inductive** types You have to add the letter "N" after resistor type. Ex.: **CSN** - **RBN**

To order CS resistors taped on reel add the suffix **/73** after the resistor type. Ex.: **5CS/73 1K0 J**  
 Quantity for reel: 1500x2CS, 1000x3CS, 5CS and 6CS

Tolerances: **K** 10%      **G** 2%  
**J** 5%            **F** 1%  
**H** 3%            **D** 0.5% (for values above 1R0)

**Cross-Reference ATE Electronics**
